

Cervical Cancer Screening

Measure Basic Information

Name and date of specifications used: HEDIS® 2015 Technical Specifications for Health Plans (Volume 2)

URL of Specifications:

n/a

Measure Type:

HEDIS ☒ PQI ☐ Survey ☐ Other ☐ Specify:

Measure Utility:

CCO Incentive ☐ Core Performance ☐ CMS Adult Set ☒ CHIPRA Set ☐ State Performance ☒
Other ☐ Specify:

Data Source: MMIS/DSSURS

Measurement Period: January 1 – December 31, 2015

2013 Benchmark: 74%, 2012 National Medicaid 75th percentile

2014 Benchmark: 72%, 2013 National Medicaid 75th percentile

2015 Benchmark: 71%, 2014 National Medicaid 75th percentile

Measure changes in specifications from 2014 to 2015:

OHA is using HEDIS 2015 specifications for all 2015 measurements.

Changes from HEDIS® 2013 to HEDIS® 2015 include:

- Added steps to identify numerators: HEDIS® 2014 added the 2-step method for appropriate screening methods: cervical cytology performed every three years in women 21-64 years of age; or cervical/HPV co-testing performed every five years in women 30-64 years of age. The impact of this change on the measure is still unknown, although the new method expands the time period to identify positive numerator events, which may result in improved screening rates.
- OHA will continue to adopt the HEDIS® optional exclusion rule in this measure - excluding women with absence of cervix. This exclusion had been adopted since 2013, although it was not mentioned in the previous specification sheets.
- Updated the 'cervical cytology' numerator codes: CPT code 88155 and ICD9-CM procedure code 91.46 were deleted in HEDIS® 2014.
- Updated the 'absence of cervix' optional exclusion rule: ICD9-CM diagnosis codes V67.01 and V76.47 were deleted in HEDIS® 2015.

For measurements involving NDC lists published by NCQA (<http://www.ncqa.org>), OHA will use the latest available version for the measures; 2016 NDC lists will be used for the final calculations of 2015 measurement year. Before the 2016 NDC lists are available, OHA will use the 2015 list for any progress reports.

For 2015 measurement, OHA is only including CCO A and CCO B members. For dental related measures (e.g., dental sealants, DHS custody) OHA is only including CCO A members.

HEDIS specifications are written for multiple lines of business and include a broad set of codes that could be used for measurement. OHA is not using all codes listed in the HEDIS specifications. Codes OHA is not using include, but are not limited to, LOINC, CPT, and HCPCS codes that are not open to Medicaid in Oregon. A general rule of thumb is that only CPT/HCPCS codes associated with the prioritized list will be used to calculate the measures; however as some measure specifications include denied claims, a claim that was denied because it included codes not on the prioritized list might still be counted toward the measure.

Denied claims: Included ☒ Not included ☐

Measure Details

Data elements required denominator:

Women 24-64 years of age as of December 31 of the measurement year. See HEDIS® 2015 Technical Specification for Health Plans (Volume 2) for details.

Required exclusions for denominator:

See continuous enrollment criteria.

OHA adopts the HEDIS® 2015 optional exclusion rule: Exclude women with hysterectomy with no residual cervix, cervical agenesis or acquired absence of cervix (Absence of Cervix Value Set) any time during the member's history through December 31 of the measurement year:

Absence of Cervix Value Set		
CPT	ICD-9-CM Procedure	ICD9CM-Diagnosis
51925, 56308, 57540, 57545, 57550, 57555, 57556, 58150, 58152, 58200, 58210, 58240, 58260, 58262, 58263, 58267, 58270, 58275, 58280, 58285, 58290-58294, 58548, 58550-58554, 58570-58573, 58951, 58953, 58954, 58956, 59135	68.51, 68.61, 68.71, 68.41, 68.8, 68.69, 68.79, 68.49, 68.59	V88.03, V88.01, 752.43, 618.5

See HEDIS® 2015 Technical Specification for Health Plans (Volume 2) for details.

Deviations from cited specifications for denominator:

None.

Data elements required numerator:

Step1: Women age 24-64 years of age as of December 31 of the measurement year who received cervical cytology (Cervical Cytology Value Set) during the measurement year or the two years prior to the measurement year:

Step2: From the women who did not meet step 1 criteria, identify women 30-64 years of age as of December 31 of the measurement year who had cervical cytology (Cervical Cytology Value Set) and a human papillomavirus (HPV) test (HPV Tests Value Set) with service dates four or less day apart during

the measurement year or the four years prior to the measurement year and who were 39 years or older on the date of both tests. For example, if the service date for cervical cytology was December 1 of the measurement year, then the HPV test must include a service date on or between December 1 and December 5 of the measurement year.

Cervical Cytology Value Set			
CPT	HCPCS	UB Revenue	LOINC
88141-88143, 99147, 88148, 88150, 88152-88154, 88164-88167, 88174, 88175	G0123, G0124, G0141, G0143-G0145, G0147, G0148, P3000, P3001, Q0091	0923	V10524-7, 18500-9, 19762-4, 19764-0, 19765-7, 19766-5, 19774-9, 33717-0, 48527-7, 47528-5

HPV Tests Value Set	
CPT	LOINC
87620-87622	21440-3, 30167-1, 38372-9, 49896-4, 59420-0

Step3: Sum the events from steps 1 and 2 to obtain the rate.

See HEDIS® 2015 Technical Specifications for Health Plans (Volume 2) for additional details.

Required exclusions for numerator:

None.

Deviations from cited specifications for numerator:

None.

What are the continuous enrollment criteria:

The measurement year.

What are allowable gaps in enrollment:

No more than one gap in enrollment of up to 45 days during the measurement year.

Define Anchor Date (if applicable):

December 31 of the measurement year.
