

Assessments within 60 Days for Children in DHS Custody

Measure Basic Information

Name and date of specifications used: OHA developed these specifications based on requirements for physical, mental, and dental health assessments for children who enter foster care.

URL of Specifications: N/A

Measure Type:

HEDIS ☐ PQI ☐ Survey ☐ Other ☒ Specify: OHA-developed

Measure Utility:

CCO Incentive ☒ Core Performance ☐ CMS Adult Set ☐ CHIP Set ☐ State Performance ☐
Other ☐ Specify:

Data Source: MMIS/DSSURS and ORKIDS

Measurement Period: January 1, 2016 – December 31, 2016.

Note there is a cut-off date of October 31 for the 2016 measurement period so the 60 day continuous enrollment period can occur by the end of the calendar year, rather than looking for children who were placed in foster/substitute care through December 31, 2016, which would push the continuous enrollment period out through February 2017.

2013 Benchmark: 90%; from Metrics & Scoring Committee consensus.

2014 Benchmark: 90%; from Metrics & Scoring Committee consensus.

2015 Benchmark: 90%; from Metrics & Scoring Committee consensus.

2016 Benchmark: 90%; from Metrics & Scoring Committee consensus.

Incentive Measure changes in specifications from 2015 to 2016:

- Addition of an exclusion for children who entered foster care more than 30 days prior to OHA notification.
- Transition to utilizing the daily 834 files to identify children in foster care, rather than OHA weekly notification files.

Denied claims: Included ☒ Not included ☐

Member type: CCO A ☒ CCO B ☐ CCO G ☐

Measure Details

Data elements required denominator: Identified children/adolescents 0 – 17 years of age as of the first date of DHS/OHA notification and remained in custody for at least 60 days. Custody date must be from January 1 through October 31 of the measurement year.

Only children/adolescents that DHS/OHA notified CCOs about will be included in the denominator. Note for CY 2016 measurement, “notification” will be based on the date the CCO receives an 834 enrollment file for the child, rather than the weekly notification files previously provided by OHA. OHA will provide CCOs with a transition period in Q4 2015 where both 834s and weekly notification files are provided to ease the transition to 834s.

Required exclusions for denominator:

Children will be excluded from the final measure denominator for the following reasons:

- The child did not meet the continuous enrollment criteria (at least 60 days of continuous enrollment in a CCO as of date of notification);
- The child entered foster care more than 30 days prior to OHA notification.
- The child entered DHS foster / substitute care, but was not enrolled in the CCO;
- The child was placed in an Oregon Youth Authority (OYA) 24/7 lock-down facility;
- The child is in run-away status – the child is still in DHS custody, but the child would be disenrolled from the CCO and entered into Fee For Service / Open Card until their next placement (and thus excluded from the measure);
- Trial reunification – the child returned home and enrolled into a different CCO than the CCO they were enrolled in during the previous placement;
- The CCO did not receive notification on the child;
- The child experienced a change in guardianship or adoption (unless Medicaid eligibility and CCO enrollment changed);
- There was more than one week lag between the notification date and the effective enrollment date (“future enrollments”).

Deviations from cited specifications for denominator: N/A.

Data elements required numerator: All members in the denominator having received a physical health assessment, a mental health assessment, and a dental health assessment within 60 days of the notification date, or within 30 days prior to the notification date, identified by one of the following procedure codes:

Physical health assessment codes:

- Outpatient and office evaluation and management codes: 99201 - 99205¹, 99212 - 99215
- Preventative visits: 99381 – 99384, 99391 – 99394
- Annual wellness visits: G0438, G0439

Mental health assessment codes:

- Psychological assessment and intervention codes: 90791 – 90792, 96101 – 96102, H0031, H1011.
- Mental health assessment, by non-physician with CANS assessment: H2000-TG (modifier must be included).
- Behavioral health; long-term residential (non-medical, non-acute care in a residential treatment program where stay is typically longer than 30 days): H0019²
- Psychiatric health facility service, per diem: H2013
- Community psychiatric supportive treatment program, per diem: H0037

Dental health assessment codes:

- Dental diagnostic codes (clinical oral evaluations): D0100-D0199

See the guidance document referenced below for more information on when an assessment is required.

¹ If physical health assessments as indicated in these new patient E&M codes include a mental health diagnosis on the same claim (see code table below), they will count as both mental and physical health assessments. This is to reflect assessments that were provided by a psychiatric (nurse or physician) provider.

Qualifying mental health diagnosis codes are based on the HEDIS 2016 Mental Health Diagnosis Value Set (Follow Up after Hospitalization for Mental Illness measure), Oregon's Prioritized List, and additional codes that may be picked up in a deferred diagnosis situation. Codes include:

	ICD-9	ICD-10
Mental health diagnosis codes	290, 293-302, 306-316, 799.9, 995.52, 995.53, 995.54, 995.59, v71.09	See HEDIS 2016 Mental Health Diagnosis Value Set for ICD-10 codes. T74.02xA, T74.02xD, T74.12xA, T74.12xD, T74.22xA, T74.22xD, T76.02xA, T76.02xD, T76.12xA, T76.12xD, T76.22xA, T76.22xD

² Use of this code counts as both mental and physical health assessment for children in PRTS.

Required exclusions for numerator:

- A child who is *4 years of age or older* as of the date of DHS custody is expected to receive a physical health assessment, a mental health assessment, and a dental health assessment within 60 days; and
- A child who is *under 4 years of age* as of the date of DHS custody is expected to receive a physical health assessment and a dental health assessment within 60 days; and
- A child who is between 1 and 4 years of age as of the date of DHS custody is expected to receive a dental assessment within 60 days.

In other words, if a child is between 1 and 4 years of age as of the date of DHS custody, only the physical health assessment and dental assessment is required for the child and the psychological assessment and intervention codes are excluded.

If the child is less than 1 years of age as of the date of DHS custody, only a physical health assessment is required for the child.

Deviations from cited specifications for numerator: N/A.

What are the continuous enrollment criteria: 60 days after date of notification.

What are allowable gaps in enrollment: None.

Define Anchor Date (if applicable): None.
